<b>Notes</b>	All mileages are one-way.						
	Weather conditions at the summits and on the higher slopes of the Black Mountains are often very different than in the valley. Temperatures can be 10 to 15 degrees lower with strong winds creating low wind chills. Be prepared for these conditions with extra layers. During warm weather lightning often strikes on the crest and slopes.						
	Be prepared for ice on these trails in winter.						
	Permanent sources of water on each trail are not generally available unless noted otherwise.
